

SALES TOOLS

for the fitting table, for promotional campaigns, and much more.

LUMOS has developed a wide variety of tools to make your sales talks a little easier every day. The focus is on sales tools that demonstrate the functions and advantages of polarizing lenses under extreme lighting conditions. In addition to large-format demonstrators for the show window, the particularly handy minis have been thoroughly tested for sales talks. And there's a little thank-you for the customers, too. Wait and see what it is!

LUMOS has developed eyeglass frames for daily use in demonstrating sample glasses: Our attractive, high-quality LUENETTES are very easy to fit lenses to, and are just as flexible in fitting as the lenses you sell.

LUENETTE by LUMOS

For the show window

For the display case

For the fitting table

For the pants pocket

FOR LENSMAKING WITH YOUR CHOICE OF SAMPLE GLASSES

LUENETTE

You can fit lenses into these high-quality plastic eyeglass frame yourself. Your lenses come in a wide variety – and so are the fitting options for LUENETTE. Use the eyeglass frames

- For demonstrating polarizing lenses
- For sample and reading glass lenses
- Or for color filters
- For use with spherical lenses with refraction
- As a practical supplement to the products of our POLADEMO series.

Fit the frames with different glass designs in different add-ons. This lets your customers see the features of the glasses with their own eyes, so they can decide on the best solution more easily.

The frames are made of two-sided satinized, translucent acrylic glass. With their clear, beautiful design, they are also resistant to scratches and signs of wear.

At a minimum order quantity of 1.000 units and up, you can also order LUENETTE in your preferred colors to match your store and corporate design!

Standard color

Color	White snow - white	Item number	001.183
-------	--------------------	-------------	---------
